

Mass Flow You Can Rely On – Year After Year

From “just hardware” to a managed lifecycle for your MFM/MFC devices

Why it Matters

Your mass flow meters and controllers sit in the middle of critical, high-value processes. Drift, downtime or failure don't just impact the device – they cost you productivity, time and reputation.

Many suppliers sell the device and walk away.
Bürkert is with you for your full lifecycle.

Annual Calibration & Health Check

- Factory by our specialists in Huntersville, North Carolina
- Certificates traceable to recognized local & global standards
- Early detection of drift, contamination or installation issues

We don't just ship boxes – we take responsibility for performance over time

Extended Warranty, Not Just Fine Print

- Extended warranty that mirrors our standard warranty over a longer period
- Extended by maintaining annual calibration carried out by Bürkert & our authorized service partners
 - Clear coverage and documented history for every serial number

Warranty linked to real lifecycle care, not just small print

Dependable Performance, Predictable Cost

- Fewer surprises from unplanned failures
- Easier audits and qualification
- Planned lifecycle for your mass flow assets, not reactive firefighting

Service, calibration and application know-how all under one roof

(Full terms and conditions are defined in our Standard Warranty and Extended Warranty Certificate.)

Add lifecycle assurance to your next mass flow project

Ask us to include a Mass Flow Lifecycle Program & Extended Warranty option with your quote.
